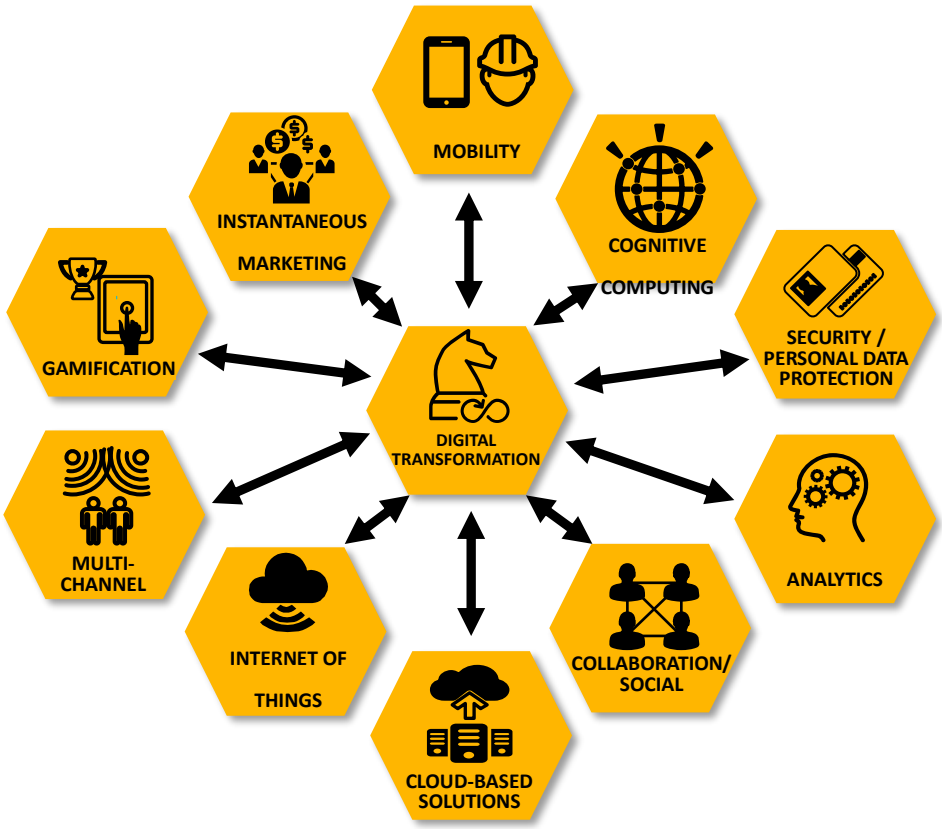
TRANSFORMATION METHODOLOGIES & INITIATIVES

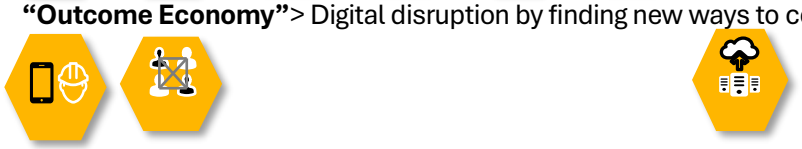
I partnered in the past 17 years at my employers / clients with both the Business and Technology teams to change how these teams operated and delivered value to internal and external customers by aligning all those teams around some of the ten (10) modern digital technology areas.



This was done by challenging the status quo, and focusing on the following five topics:

1. **"Deliver First"** > Augment the digital experience of customers;

2. **"Outcome Economy"**> Digital disruption by finding new ways to competitively deliver;



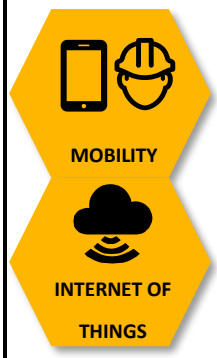
3. **"Platform Evolution"** > Define new ecosystems where we can compete, and monetize on that evolution;

4. **"Intelligent Enterprise"** > Putting in place the enterprise architecture to become efficient and competitive;

5. **"Workforce Reimagined"** > working with HR and Business teams to gain momentum in developing the workforce to be at the forefront of technology

Mathieu Prichonnet | 646-584-8331 | mathieu_prichonnet@yahoo.com

Some examples of Technology projects I spearheaded



Internet of Things (IOT) & Mobility: Implemented functionality at prior employers to Increase work efficiencies / field services / reduction repair costs & time (internally or externally) using Mobility. Direct impact on processes & face-to-face interactions. Lead the implementation internal platform (through proprietary SW suite of systems) for communication chat or video capabilities / face to face drone flight prep – on demand help to pilots / troubleshooting calls, etc. IOT / Sensors – design / manufacturing of delivery drones with full sensors for live feedback loop on all components (HW, SW, Avionics, etc.) $50M initiative to manage over $350M in capital projects

Collaboration / Social: Engage internal Sales & Services teams using Social Media channels to input into CRM tool. Gather data insight as well as generated net new sales by developing the Customer Insight & Growth Strategy (Sales & Customer Service). Solved “customer issues” live (reduce pressure on Service Centre), and piloted community engagement app. Monitored the community's activity and analyzed pilot community activity / collaborations through analytics. $5M initiative to manage a sales pipeline of $150M.

Cloud based solutions: Cloud implementation / Migration from on prem. Developed past employer’s cloud in preparation for Licensing rights. Analyzed Cloud operating behaviour from clients / enterprise hybrid cloud / Internally optimize all our 150+ SaaS applications (Implementations: BPM (Orace Unifier), HRIS (Workable, Paylocity, Workday), Engineering (Jama-Connect - E2E traceability and audit of HW, SW components), Finance (MS D365 F&O / BC, SAP, AP/AR - Medius), Ideation / Product (Aha!). Solution Architecture, Data Insights & Analytics, Infosec (NIST, SOC2), and many more
