PROFESSIONAL SERVICES STRATERGY

PROFESSIONAL SERVICES

Building repeatable complexity & successful delivery team = service excellence

How I ran successfully a delivery team…

1) Built systematic, integrated approach towards Knowledge Management (developed through a Center of Excellence of the ePMO for example)
2) How I developed efficient knowledge management throughout my team
    - Built KM team (sold it to leadership)
    - Ran knowledge fairs
    - Developed *who-knows-what* directory (dictionary of your team's capabilities)
    - Developed a *how to get their* guide (training plan of how to get your team trained)
    - Developed Intellectual Property
    - Developed and curate knowledge repositories (each team member from Jr Analyst to Principal needs to contribute as part of their second job)
    - Did regular KM Audits
    - Communicated constantly!

PROFESSIONAL SERVICES

Building repeatable complexity & successful delivery team = service excellence

Examples of specifics solution I implemented…

- KM team > rotating KM team lead / every level contributes (part of their quarterly goals)
- Run knowledge fairs > Lunch & Learn / present White Papers / 1-3 hours per designated person on client knowledge transfer / lessons learned
- Develop *who-knows-what* directory > dictionary of my team's capabilities / connect people-with-people / open door policy / juniors to shadow seniors / challenge 90:90 (90% of people knows 90% of company) - used Method Grid
- Develop a "*how to the team up and running"* guide (training plan of how to get your team trained) > have a plan to get people where they need to go
- Develop Intellectual Property > Content (Blogs, Powerpoint / video / white papers), Methodology (Handbook, digital enterprise methodology, Standard Operating Procedures, Dataset, Diagnostic tools, Software - Smartsheets, Asana, Jira, etc.), Registered IP (URLs, trademark, Patents, registered media profiles)…it has to be intuitive, Dynamic, Empowering, Accessible and Secure.

CUSTOMER SUCCESS

From an internal point of view…

Marketing (S)
Technical Support (TS)
Sales (S)
Customer Success (CS)
Sales Engineering (SE)
Professional Services (PS)
Product & Engineering (P&E)

1. **Adoption:** *Delivery* > (PS) > Need to deliver flawlessly
2. **Retention:** *Post-Sale Strategy*
   - Sustainable funding model supported by premium offers > (CS) + (PS) + (TS) + (S) + (P&E) >Need to have a Growth-oriented charter to customer success > Need to have a Combination of free and fee-based Support SLAs
   - Clarity on capabilities to build internal capabilities (PS) + (CS) + (P&E)
3. **Expansion:** *Advance Analytics* > (S) + (SE) > Predict customer behavior and target new segments. Introduce Change Management methodology to be more agile in changing internal processes
4. **Advocacy:** *Customer first focus* > (All) > Promoting and adopting a Customer-success culture across the organization > Cross functional approach where all departments contribute
